Al Ogayell

CONSULTING ENGINEERS

Our Team is a provider of comprehensive building design, research, and related consulting services to a broad range of markets including educational, government, corporate, industrial, and healthcare. Al Ogayell is a pre-qualified with several other major prominent governmental sectors and companies around the kingdom. Theses relationships have been developed over several years and has been part of our business expansion. We are providing these governmental sectors and companies similar services to that of you in respect of design, programme and cost management consultancy with a proven track record to these clients.

Who We Are

We are a team of architects, engineers, and other professionals who are dedicated to expertise-driven design. We are passionate about our work, inspired by our clients, and committed to shaping a better world through integrated sustainable design. We believe that the best designs arise from a collaborative journey of discovery with our clients that reveals insights journey of discovery with our clients that insights and spurs innovation.

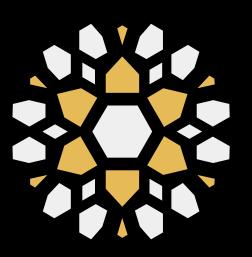

O C E COMMITMENTS

Al Ogayell CE Team is pre-qualified with several other major prominent governmental sectors and companies around the kingdom. These relationships have been developed over several years and has been part of our business expansion. We are providing these governmental sectors and companies similar services to that of you in respect of design, programme and cost management consultancy with a proven track record to these clients.

We should be delighted to provide our services to work with you for an opportunity to participate in Design and to be involved in upcoming projects.

SERVICES

OUR TEAM

We are a multi-national team of Architects, Engineers and other professionals, all grouped under our passion for design and excellence.

3D DESIGN

Visualize in stunning details your dream house or project, uncover new possibilities and improve your idea, We present a life-like 3D design that is nearly real

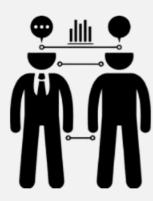

TURNKEY SOLUTIONS

Design, Construct, Supervision, Equip and Furnish, provide all permits and handover the key. One contact person for all your needs.

Construction Supervision

We will handle multiple contractors and sub-contractors that are required on site, ensuring the use of proper materials, best construction practices, and being on time for the final delivery of the project

VALUE MANAGMENT

We use a combination of planning tools and methods to find the optimum balance of the project benefits.

ENGINEERING SERVICES

Civil & Structural, Mechanical, Sanitary, Electrical, Fire protection, Telecommunication, Privacy & Security

TURNKEY SOLUTIONS (AIO): Design,, construction supervision, equip and furnish, provide all permits and handover the key. One contact for all your needs.

INTERIOR & EXTERIOR DESIGN (3D): Visualize in stunning detail your dream house or project, uncover new possibilities and improve your idea, we present a life like 3D design that is nearly rear.

SITE PLANNING & DEVELOPMENT: Based on the plot of the client, our team can prepare a complete proposal for the use and best investment options with a complete study of the market and surrounding area regarding the plot for the client

CONSTRUCTION SUPERVISION / PROJECT MANAGEMENT : We will handle multiple construction and sub-contractors that are required on site, ensuring the use of proper materials, best construction practices, and being on time for the final delivery of the project.

VALUE MANAGEMENT: We use a combination of planning tools and methods to the optimum balance of the project benefits. Assessing and developing the project in order to make the right decision about the optimized balance of the benefits, risk and costs

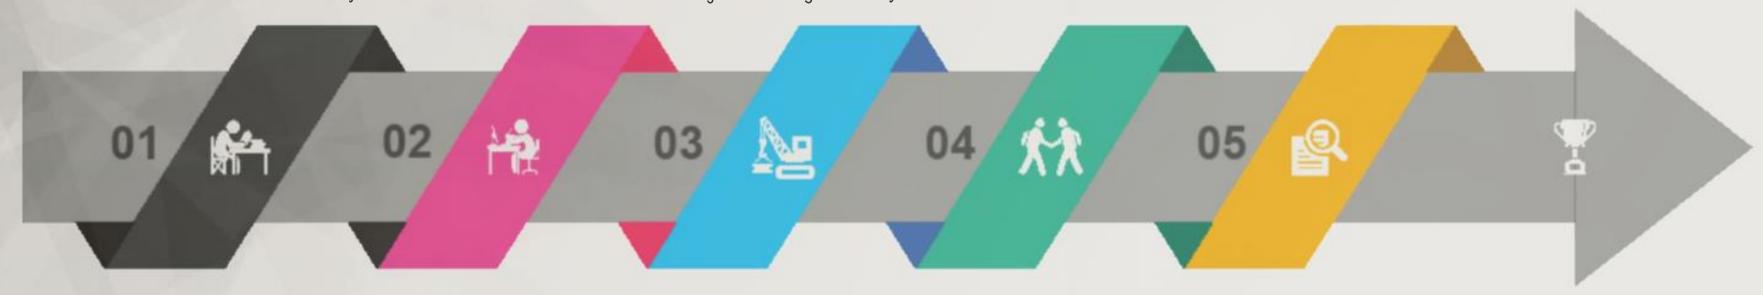

ENGINEERING SERVICES: Civil and Stuctural, Mechanical, Sanitary, Electrical, Fire Protection, Telecommunication, Privacy \$ Security.

DESIGN APPROACH

As a result of our past years of industry experience across wide range of sectors, we have gathered a huge amount of practical knowledge and this reflected which we have based on the following 5 Project Phase.

Each project phase has a corresponding set of standard documents and process, procedures which are adhered to irrespective of the size or type of project and it is this Consistency that ensures the correct level of Project Management by OCE to the client.

Pre-Design

The most advantageous to the client to involve the Architect and Engineers in the earliest stages of the project. It covers a broad line of architectural services raging initial problem identification to activities that would allow the Architect \$ Engineers to initially conceptualize an array of solutions. This includes consultation, feasibility studies, site inspection and analysis, space planning and value management.

Design Development

The Architects and Engineers translatethe client's needs and requirements into space and forms in the best manner ofprofessional service. This includes schematic design, prepares initial line drawings representing design studies to a recommended solution for clients approval, design development that consist of plans, elevations, detailed drawings, outline specification to fix and illustrate the character of the entire project as to type of structural, electrical, mechanical sanitary, electronics and communication system.

Execution

In this phase, it is where the implementation of the design happens, through construction and supervision, it is where we assume this the professional responsibility and the construction of the project. The Architectural and Engineering profession have devised several methods of project delivery with the ultimate goal of handling projects in the shortest possible time, at the lowest possible cost at an acceptable quality and performance.

Close-Out

Handing over of the site to the clients once the contract administration has confirmed that work defined in the contract documents are complete and a job well done.

Review

Lessons learned. It is inevitable that we learn from our project, no matter how big or small. Every project is different, with its own special risk, new design, new site and so on. Experiences from one project can strengthen our performance on future projects, even its not similar in many ways. It is important to reflect on all the events and experiences — mistakes as well as successes so that the work on the next future projects will have an improved experiences based.

CELEBRATING OUR 40TH YEAR ANNIVERSARY

Nasser Alogayell

FOUNDER

From his early years, he showed his love for mathematics and art, so following up in becoming a Civil Engineer was a natural choice for him. He started OCE Group in 1982 in Riyadh, and quickly became known for his modern style thus still keeping in touch with tradition.

He implemented new materials in his designs and kept a great balance between modern and classic design.
